Originally used in reference to a feature on some formal horse-drawn carriages, the folding landau top was used in comparable coachwork for automobiles. After the grand era of custom auto body work in the 1920s and 1930s, the concept of a landau top changed from a functional feature on limited production car bodies to a decorative feature on higher volume cars. Instead of a folding soft top over the rear seat of a formal town car, landau tops became a rigid, decorative roof cover for upscale sedans, especially after 1960. From about 1964 through 1985, this term came to refer to any vinyl roof-cover on sedans, promoted especially by Chrysler, Ford and General Motors. Some of these were embellished with dummy landau bars: gently "S" shaped, chromed bars reminiscent of functional parts on the outsides of folding landau tops decades before. The landau top, in its later form, persists on the roofs of American stretch limousines and received further embellishment in the form of simulated convertible tops from about 1980 onward. Sold by the yard, 49" wide.

Crush Grain

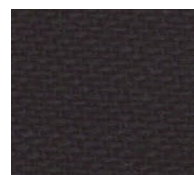

Heavy duty Four Ply sport topping vinyl with crush grain PVC outer layer and polyester/cotton blend inside lining fabric. Sold by the yard, 54 " wide.

Black / Black

White /Black

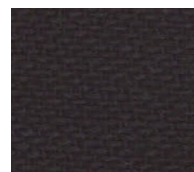

Cobra Grain

Widely used by the North American auto industry in early decades, variants of this grain were called Cobra, Short and Short Cobra. The grain geometry varied among fabric makers and also varied over time. Earliest forms around 1910 were shallow and indistinct. Sold by the yard, 54 " wide.

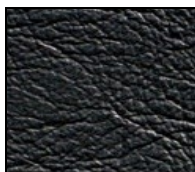

Black / Black

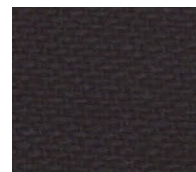

Bison Grain

The Bison name came from British use, while Colonial grain was the North American name. In the U.S. auto industry, trade literature refers to Colonial grain materials at least back to 1930. The grain is representative of animal-hide type grains back to around 1910. Sold by the yard, 54 " wide.

Embossed Welt - Style 180 Also Called "Seat Piping". This is used mainly on automotive and marine seating to join two pieces of material together at the seam giving the seat a finished look. Embossed Welt is created with a slit flange for easy tailoring and workability, manufactured with a 5/32" embossed head as found in automotive original equipment. Excellent for marine and automotive seating, UVR treated with a special additive for softness.
